

UZOMA PECULIAR

Location: Abuja, Nigeria

uzomapeculiar1@gmail.com | +2348162145354 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SKILLS

Programming Languages: Python | SQL | R

Technologies: MS Excel | MySQL | Power BI | VS Code | Pandas | Google Sheets | MS Word | Seaborn | Tableau | Jupyter Notebook | R Studio | MS PowerPoint | Numpy | Matplotlib |

EDUCATION

BACHELOR OF SCIENCE (ECONOMICS)

Covenant University

Expected Oct. 2026

Ota, Ogun

WORK EXPERIENCE

HEBRON STARTUP LAB

Oct. 2024 – Oct. 2025

Data Analyst Intern

Ogun, Nigeria

- Identified 3 key growth drivers through detailed data reviews, helping increase project success rates by 10%.
- Worked with different teams to turn raw data into clear reports that helped guide product and underwriting decisions.
- Collected and analysed data using statistical methods and tools such as Python and R

INTASK

Feb. 2024 – Apr. 2024

Data Analyst

America, Remote

- Conducted exploratory data analysis (EDA) on large datasets to identify trends and insights using Python and SQL.
- Assist in the creation of interactive dashboards and reports using Tableau for stakeholders to support decision-making processes.
- Presented analytical findings to stakeholders, providing recommendations based on data-driven insights.

INTERNCAREER

Nov. 2023 – Sep. 2023

Data Science Intern

Virtual

- Built a Power BI dashboard using DAX and Excel to track global trends, focusing on making the data easy to read and accurate.
- Analysed large datasets to find trending topics, providing insights that helped improve brand partnerships and collaborations.

PROJECTS

CUSTOMER CHURN PREDICTION

- Identified key client data and outlined a strategic investigative approach using Python
- Engineered a Random Forest model with a 50% recall rate to predict client churn.

FINANCIAL LOAN ANALYSIS

- Segmented loans into good and bad categories, calculating risk metrics such as average interest rates and DTI to pinpoint factors linked to defaults.
- Leveraged libraries such as Matplotlib, Seaborn, and Plotly to prepare visualizations highlighting loan portfolio patterns and financial outcomes
- Analyzed financial loan data using Python tools like Pandas and Seaborn to assess portfolio performance, identifying key trends in applications, funding, and repayments over time.

GLOBAL TERRORISM DASHBOARD

- Developed interactive Power BI dashboard using Global Terrorism Database to visualize attack trends, geographic hotspots, weapon types, and casualties from 1970-2017.
- Cleaned and prepared dataset with Power Query, addressing missing values, outliers, and data type inconsistencies for reliable insights.
- Explored key patterns in terrorism data, including annual frequencies, regional impacts, and attack methodologies, to support informed decision-making.

WALMART AND RETAIL SALES ANALYSIS

- Built Walmart sales database in SQL, defining schema for key metrics like revenue, quantity, and customer details to enable structured data analysis.
- Transformed raw sales data by adding computed columns for time of day, day, and month, improving query efficiency for trend identification.
- Performed exploratory analysis with SQL queries to uncover insights on top product lines, monthly revenue, branch performance, and customer demographics.

HR ANALYTICS DASHBOARD

- Created interactive HR Analytics Dashboard in Power BI to monitor employee attrition, demographics, and performance metrics across departments.
- Cleaned and integrated HR dataset using DAX and Power Query, enabling dynamic visualizations for headcount, turnover rates, and diversity analysis.
- Uncovered key insights on factors driving attrition, such as job role and tenure, to inform targeted retention strategies.
